METALLOGRAPHY
AN INTERNATIONAL JOURNAL

Published in Association
with the International Metallographic Society

METALLOGRAPHY, an official journal of the International Metallographic Society, was created to meet the needs of people who study the microscopic aspects of materials. As such, the Journal is dedicated to the preservation and dissemination of technical knowledge relative to the structure of all materials. Of interest to both theory and practice, this journal is comprised of fully-refereed papers on topics including, among others, the following: Optical Analyses • Electron Analyses • X-ray Analyses • Field Ion Analyses • Field Emission Analyses • Microprobe Analyses • Structure of Metals, Ceramics and their Mixtures • Petrography • Theoretical Structural Studies • Stereology • Microscopy • Fractography • Applications of Surface Science Analyses •
